--Summary of the Invention--.

Page 4, between lines 27 and 28, please insert the following heading:

--Brief Description of the Drawing--.

Page 5, between lines 24 and 25, please insert the following heading:

--Detailed Description--.

In the Claims:

Please cancel claims 1-25.

Please add the following claims 26-55:

--26. (NEW) Jet injector for injecting a liquid medical drug through the skin of a person to be treated, comprising a housing adapted to be pressurized and hold said medical drug, defined by an enclosing periphery wall and a bottom wall having an internal surface facing the interior of the housing and an opposite external surface, the bottom wall having at least one through passage extending between said internal and external surfaces and through which, when the injector is used, said medical drug is adapted to be expelled from the housing and transformed into a thin jet stream penetrating the skin of said person, wherein said through passage includes a flow confining restriction to develop a high pressure in the medical drug expelled from the housing, wherein a body is connected to said passage and tapers in a direction away from the passage and terminates in a point, and wherein said body
